To: Examiner: Bates  
Fax Number: 571-273-3980

From: Steven C. Stewart (Tel. 206-321-9072; Fax 206-691-8452)  
Reg. No. 33,555  
Steven Stewart  
255 Crown Vetch Lane  
Alpharetta, GA 30005

Re: Application Number: 10/816,102  
Attorney Reference: SE1-0014-US

The following is a proposed agenda for an in person interview currently set for **1:30 PM EST on December 7, 2010.**

Applicants' Attorney intends to discuss certain claims to the application. Applicants' Attorney intends to discuss the proposed amendments to the claims and how the amended claims 1 and 13 overcome any 112 issues, and the reasons for allowance of amended claims 1 and 13 in view of Mulgund et al. (US 2002/0161751 A1) ("Mulgund") in view of "TAG: a Tiny Aggregation Service for Ad-Hoc Sensor Networks" to Madden et al. ("Madden TAG") and further in view of Ahmed (US 2004/0144849 A1) ("Ahmed"). The claims to be discussed are attached.

Applicants' Attorney intends to discuss why claims 1 and 13 do not map on the Ahmed reference. (See Ahmed paragraph [0006]) Applicants' Attorney also plans to discuss the legal basis for why the office is not giving patentable weight to first and second business entity as recited in the claims.

Claims

## 1. A method comprising:

transmitting with a first mote at least a part of an aggregate of one or more mote-addressed content indexes of a first set of motes administered by a first network administrator owned or controlled by a first business entity to an aggregator of (i) a first-set content index from the first set of motes administered by the first network administrator owned or controlled by the first business entity and (ii) a second-set content index from a second set of motes administered by a second network administrator owned or controlled by a second business entity.

## 13. (Currently Amended) A system comprising:

a device coupled with a first mote to transmit at least a part of an aggregate of one or more mote-addressed content indexes of a first set of motes administered by a first network administrator owned or controlled by a first business entity to an aggregator of (i) a first-set content index from the first set of motes administered by the first network administrator owned or controlled by the first business entity and (ii) a second-set content index from a second set of motes administered by a second network administrator owned or controlled by a second business entity.
